

## Why Our Service Makes Sense

In addition to convenience, mobile diagnostic health care services are very cost efficient. Our clients save on:

- Costly Equipment
- Required Licensing
- Required Quality Control
- Payroll Overhead

While nursing homes can eliminate the need for costly transport of patients; the homebound can receive services they need without the stress and expense of making travel arrangements.

We have invested in the best mobile equipment, which allows for test and procedure results in a timely manner. We complete all physicians' orders within a 24-hour period, assuring our clients no unnecessary delays.

As an added convenience, we will process claims and payments can be covered through third party payers. We accept Medicare and Medicaid as well.

Our technologists provide the highest quality service available with a genuine concern for patients. We choose our people with great care and it shows.

# Who We Are:

Owners,  
Tom and  
Tomijean  
Wuerstle,  
founded

their family-owned business over 25 years ago with one goal in mind. Together, they wanted to offer a convenient and cost-effective alternative to conventional health care services to the house-bound patient. The continued need for these services combined the Wuerstles' commitment to quality is what makes, Diagnostic X-Ray Service, Inc. (DXS) successful.

Their technologists and staff come to you with a solid professional background. They not only have the training and experience that is necessary, but demonstrate the personal caring and sensitivity that is essential. Patients are treated with the warmth and concern they deserve at all times.

For quality service, convenience, state-of-the-art testing and cost-saving benefits, ours is the intelligent approach to modern health care.

# What We Do:

Diagnostic X-Ray Service, Inc. provides fully mobile and portable diagnostic testing. We perform a variety of tests and procedures with equipment and technologists that come directly to the patient. Our mobile vans are equipped with the latest technology and staffed by licensed and trained professionals, providing our clients with on-site service.

We currently provide services to:

- Nursing Facilities
- Industrial Facilities
- Physician Offices, Hospitals & Clinics
- Prisons, Detention Centers & Holding Facilities
- Private Homes

We also work in conjunction with home health agencies to serve individual patients in residential settings.

For more information on what on-site services Diagnostic X-Ray Service, Inc. can provide for you, please call today:

In keeping abreast of technology and diagnostic capability, DXS has implemented **Picture Archival and Communications System**, more commonly known as PACS. PACS enables clients to view X-Rays and scans electronically on video screens with a touch of a button. In addition, DXS offers **Computerized Radiography (CR)**. CR offers digital radiography that combines database management, film digitization, and filmless radiography. This system not only eliminates the costs associated with chemical maintenance, film storage, hazardous material handling, and darkrooms; but it allows for faster processing time, improved data management and allows for remote analysis.
